## Van Mounted Cherry Pickers

Cherry Picker Limited have been a leading expert in the supply of access machinery in Ireland since 1994 and we are also delighted to announce that we sole partner with France Elevat ur in Ireland for our van mounted hoists.

Furthermore, we are an approved Vehicle Body Builder certified by the NSAI and as a result we have been able to develop a range of high-quality Van Mounted hoists for the Irish and UK market.

Our main office is located in Kilmoon Business Park, Ashbourne Co. Meath meaning we are a local manufacturer on the ground with excellent nationwide sales, service and support.

*Please note:* throughout this document we have inserted links in blue to other documents and information. Simply click the link to open the information.

### [Hoist Options Currently Available:](#)

We can offer two types of Van Mounted hoist options with a host of additional options available upon request.

1. 132F - 13 meter, two-person basket with outriggers ([click for Specs](#))
2. 132F Hybrid powered boom
3. 121Ft - 12-meter, one-person basket with outriggers ([click for Specs](#))
4. 121Ft Hybrid powered boom

## The Process:

As an Approved Vehicle Body Builder, we are able to assemble the van mounts here on site in Ashbourne to the highest possible standard.

With our experienced team we have been able to manufacture our stock from the ground up. With this we have developed these products to a very high standard for our customers

Please see the process below from receiving the hoists to the finished product.

## **Kits Arrive in Cherry Picker**

The hoists are delivered directly from the France Elevat ur factory to Cherry Picker for our team to begin assembly.

Picture 2

## Van Once Kit turret has been installed

Picture 3

Picture 3

As can be seen from the pictures three and four above, once mounted the turret takes up a very small amount of space as it is positioned directly behind the bulk head of the van. This leaves plenty of room for any desired fit outs you may require.

### Van Options:

With the two specified mounts that we have available we offer a selection of vehicle brands these include but are not limited to the following:

- Renault Master (3.5t)
- Mercedes Sprinter (4.5t)

Any medium wheelbase, medium height van (L2H2) should be compatible but please check with a member of our Team.

## Benefits of Hybrid Boom Range

In addition to our stock, we offer a hybrid powered boom option for an additional cost and this option offers numerous benefits to the user.

### Benefits Include:

- Reduced wear and tear on the engine (unit not running when in operation)
- Reduced Fuel consumption
- Reduced emissions
- Reduced noise pollution
- Ability to switch to standard hydraulics where required
- Batteries will also charge from the vans upgraded alternator when driving
- 2 Battery Options are available the standard Gel batteries and upgraded Lithium batteries
- Hybrid powered booms come as standard with the green colour seen below but alternative options are available

## Finished Product:

At Cherry Picker we thrive on providing the highest quality products and services and with this product we believe we have achieved this. If you would like to see for yourself, please contact us to arrange a visit to our workshops and receive a demonstration on one of our completed units.

With all our finished products we offer a 2-year warranty on the boom, and a 5-year warranty on the van as standard. With Cherry Picker and France Elevat ur liaising together we have a wide range of products to meet any requirements.

Cherry Picker have also begun to supply 15-metre booms mounted on 4x4 units which are of particular interest to telecommunications companies and any other companies with a height requirement on rough terrain.

Please see an image of one such unit below:
